How to make a tumble trap

What you need:

• an old yoghurt pot, jam jar or tub
• a cover - an old slate, tile or bit of flat wood
• bait - try cheese, bacon rind, bread or fruit
• trowel - for digging

1. Dig a hole in the ground with the trowel
2. Put the pot, jar or tub into the hole and fill the gaps around the edge with soil
3. Bait your trap with your food to attract tiny visitors
4. Use the slate, tile or bit of wood to stop the rain getting in - prop up with twigs or stones
5. Go away and wait
6. Inspect your tumble trap for minibeasts
7. Pack your trap away when you've finished

Remember to check your trap every few hours as minibeasts can't escape

Release all your new friends carefully after each check
